## ONE REGIMENT IN ANOTHER'S ARMORY.

The members of the 71st Regiment made a fine appearance in the 7th Regiment armory, where they were assembled for review and the presentation of marksmen's badges last evening. The several hundred members of the 7th who were there to see how another organization looked in their armory were probably somewhat surprised at the precision and the energetic movements displayed by the visitors under guard consisting of Captain Willard C. Fisk, as officer of the day, and Lieutenants J. Watson Cochran and Schuyler as officers of the guard and an appropriate number of "non-coms" and privates was detailed by Colonel Appleton as a compliment to the visiting soldiers. NEW THINGS AT THE CIRCUS. At Barnum & Bailey's show at Midlson Square Gar-den on Monday, the reginning of the third week there were lots of new things, some of them unexpected and unpro-vided for. One such was the runaway of the horses in the four-horse tandem hurdle race. The eight horses dashed madly around the ring at the evening performance and knocked down the hurdles with angry hoofs. John O'Erien's eight trained stallions also made trouble, par-ticularly at the afternoon performance. For some reason they were extremely vicious, and it was as much as the trainer could do to manage them. Adonis and Apollo, the two white, black-spotted Arabs, were the worst of the lot. They were muzzled so they could not bite, but they kicked

and plunged madly while they were in the ring.

Among the new things on the programme the Clarks
especially notable in their trapeze and balancing acts,
the performances have all been added to, as well as the
pertacle, which has some new marches and dances.

# Pure Food in Congress.

A bill has been introduced into Congress requiring baking powders containing ammonia or alum to be so branded. The bill should pass; then if people dose themselves with "absolutely pure" ammonia or alum when taking their meals, they will do it knowingly, not ignorantly as they do now.

Such a law would affect nearly every baking powder in the market except Cleveland's-that does not contain a particle of ammonia or alum. Besides, every ingredient of Cleveland's baking powder is plainly printed on the label, information not given by other manufacturers.

A LITTLE GIRL BADLY BURNED. A little girl named Hattie Eush, eight years old, the adopted daughter of John McLeod, a wealthy resident of the Park Slope, in Brooklyn, was severely burned at her home, No. 786 Carroll-st., near Fiske Place, last evening. She was preparing to go to a party, and, with a companion, was curling her hair, with an alcohol lamp to heat the curling irons. The alcohol became nearly exhausted in the lamp, and the little girl attempted to retill the lamp while it was lighted. The fluid exploded, setting fire to her clothing, which was nearly burned off her body. Dr. John Cochran, of Seventh-ave, and Carroll-st., was summoned and treated the child. He said that she would probably recover. Her companion, a child of her own age, ca-caped unharmed.

## Where to Live and where not to Live!

This is the all-absorbing and difficult problem.

Every New-Yorker would prefer to live on Manhattan Island, rather than in the suburbs, if his means permitted, and he could get what he wanted.

What every one desires is quiet without isolation, purity of air, a pleasant sunny outlook, congenial neighbors, and nearby schools, churches, theatres,

You may search for these in vain in Brooklyn, New-Jersey and Westchester, but you will find them all in the Neighborhood created by the King Model Houses, and at moderate cost.
